

CARRYING AN INFANT 3 MONTHS TO 25 POUNDS

Important: NEVER cover your baby's face while in your carrier. Always ensure your baby is breathing regularly. If your baby is wheezing or grunting, reposition her or check with your pediatrician.

fig. c2

c1. Put the carrier on as shown in previous instructions.

c2. Hold your baby firmly and slide her into the pocket across your chest. The pocket should be behind her; her chest should be snuggled against your chest.

fig. c3

c3. Put one hand on the pocket of the wrap, holding your baby firmly. Use the other hand to pull the tails of the carrier away from your body, pulling the pocket snug against your child. Repeat with both tails until the pocket cradles your baby like a hammock and the fabric forms a deep seat. To ensure correct fit, tighten the rails (r) and body (b) of the carrier separately by pulling up and away from your body (u) as in figure c2.

fig. c4

c4. Grasp the tails tightly in your hands and cross them from your shoulder to opposite hip, forming an "X" as shown. Ensure each cross goes between your baby's legs.

fig. c5

5. Bring the tails of the carrier to your back and tie them in a square knot at the small of your back, as shown.

fig. c6

6. Spread the two crosses, one at a time, across your baby's back. Each cross should embrace her completely, as shown. The fabric of each cross will spread completely from the hollow of one knee to the hollow of the other knee.

fig. c7

7. IN-ARMS CHECK: The pocket panel should be pulled up to your child's shoulder blades (or, if you want, to her neck as shown in the newborn instructions). Now, hug her. She should already be wrapped snugly against you so that when you hug her, you do not need to lift her toward you. If she is not snug enough, unwrap to step 2, and this time, pull the wrap more tightly.

CARE INSTRUCTIONS

Hand or machine wash warm, gentle cycle. Place wrap into a pillowcase or sweater bag to keep it from tangling. Line or machine dry warm. Cool iron if necessary.

Wrap DuO

BY Wrapsody

USE AND CARE INSTRUCTIONS

IMPORTANT! KEEP FOR FUTURE REFERENCE

Your WrapDuO is designed to:

- Wick away moisture and sweat
- Distribute baby's weight across your back and shoulders
- Help protect your baby from sun without chemicals*
- Dry quickly to go from day to evening
- Look beautiful both in and out of water

READ AND FOLLOW ALL PRINTED INSTRUCTIONS BEFORE USE

The WrapDuO is made from a 100% polyester high-tech sports knit. This wrap carrier is designed for use in water and during low-impact activity such as yoga, walking, or dancing. This wrap is not intended for use while swimming or while engaged in sporting activities.

For use with infants from 8 pounds to 25 pounds.

If your infant was born prematurely, has respiratory concerns, or is of low birth weight, please consult a professional before using this carrier.

*Sun protection is only where your infant's skin is covered by the wrap carrier.
